

Name: Excellent Resume

Experience: 8 years

Location: Mumbai

Email: excellent.resume@email.com

Summary:

Results-driven Senior Full Stack Software Engineer with 8 years of experience in building scalable, performant web applications using React, .NET Core, and AWS. Proven leader with a track record of mentoring engineers, driving DevOps adoption, and delivering cloud-native solutions at scale.

Experience:

- Lead Full Stack Engineer, CloudGrid Technologies (2020–Present)
 - Architected and delivered a SaaS analytics platform using React (hooks, context API) and .NET Core microservices.
 - Deployed multi-region infrastructure using AWS (ECS, Lambda, RDS, CloudFront).
 - Led a team of 4 engineers, conducting code reviews and sprint planning sessions.
 - Implemented CI/CD with GitHub Actions and Terraform for infrastructure as code.
- Software Engineer, BrightApps (2016–2020)
 - Built responsive dashboards with React + Redux and REST APIs with .NET Core.
 - Integrated OAuth2 authentication with AWS Cognito and Okta.
 - Spearheaded DevOps transformation—replacing manual deployment with Jenkins pipeline.

Skills:

- React, Redux, .NET Core, C#
- AWS (ECS, Lambda, RDS, DynamoDB, Cognito)
- Docker, Terraform, GitHub Actions
- SQL Server, PostgreSQL, DynamoDB
- CI/CD, Agile (Scrum), Code reviews, Mentoring
